DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshino (USPN 6063649).

Yoshino teaches a method of connecting a component to a substrate comprising the steps of introducing a bonding agent between the component and substrate and forming a bond by increasing the joining temperature above the glass transition temperature of the substrate and exerting pressure on the component thereby plastically deforming the substrate (col 2 lines 1-57). The bonding agent is an adhesive (col 5 lines 1-26).

3. Claims 1-5, 9, 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hogerton et al. (USPN 5714252).

Hogerton teaches a method of connecting a semiconductor component (IC component, col 3 lines 4-10) to a substrate comprising the steps of introducing a bonding agent between the component and substrate and forming a bond by increasing the joining temperature above the glass transition temperature of the substrate and exerting pressure on the component thereby plastically deforming the substrate (col 3

lines 21-62 and col 6 line 30 – col 7 line 36). The conductor structure comprises tracks (traces, col 7 lines 1-5) and contact points (pads, col 6 lines 10-15). The substrate is formed of PET, which has a melting point below 120 C (col 7 lines 37-62). The bonding agent is solder made of at least two metals (col 6 lines 23-26) or an adhesive (col 2 lines 5-12).

Allowable Subject Matter

4. Claims 6-8 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hiruta (USPN 5998861).
